the entire lifespan in 500 pages what's the greatest challenge in teaching the lifespan development course covering a lifetime of material in a single term instructors from across the country have clamored for a streamlined text that captures the core concepts of life span development essentials of life span development was carefully designed and constructed to deliver these core concepts along with a strong applications focus reflecting the broad range of interests and backgrounds

of students taking this course and as always with John Santrock's texts the latest research in the field is incorporated throughout

This title is a Pearson Global Edition. The editorial team at Pearson has worked closely with educators around the world to include content which is especially relevant to students outside the United States for courses in Lifespan Development. An Introduction to Developmental Science that focuses on applications and research. Lifespan Development provides a thorough overview of developmental science with a focus on helping students apply their understanding of development to their own lives with a down-to-earth writing style and an emphasis on how concepts connect to research. Authors de

The authors believe that lifespan psychology is relevant to current career and social issues that all adults face. It is especially relevant to those who will work or live with children, adolescents, or the elderly. Their goal in writing this book is to present development at every stage of lifespan from a growth perspective. Preface. The authors wrote this new text to enable students to find themselves and the people they know in the story of lifespan development. It is a story of how we grow and change throughout our lives and of the continuities across every stage and domain of life. Back cover

Award-winning author Tara Kuther presents Lifespan Development in Context, Second Edition, a topically oriented edition of her bestselling text that provides a panoramic view of the many influences that shape human development. Kuther's student-friendly narrative illustrates how the places, sociocultural environments, and ways in which we are raised influence who we become and how we grow and change throughout our lives. Three core themes resonate throughout each chapter and across each developmental domain and topic: the centrality of context, the importance of research, and the applied value of developmental science. Foundational theories and classic studies are woven together with contemporary research and culturally diverse perspectives for a full, updated introduction to the field that is both comprehensive and concise. Case studies, real-world applications, and video examples ignite critical thinking and class discussion, ensuring students

have the tools they need to apply course concepts to their lives and future careers

the combined features that distinguish this text from other titles can be summarized with an acronym care c utting edge research a pplied developmental science r eadability e ssential knowledge written by respected child adolescent and adulthood development experts this authoritative and chronologically organized text presents an integrated perspective on lifespan development the authors write in an engaging manner synthesizing biological social cultural and socioeconomic influences as opposed to organizing content around developmental themes incorporation of classic and cutting edge research includes extensive coverage of new research in developmental neuroscience which has transformed the study of lifespan development by introducing brain maturation at the same time the text emphasizes the application of developmental psychology to real world problems focusing on the ways in which knowledge of child development can inform social policy and practice in the fields of child care education mental health and family life the text also examines the many fascinating changes that take place through adulthood to help students answer the important question who will i become tomorrow and with a separate epilogue that focuses on death and dying the book takes students on a developmental journey from our first breath to our last reflecting the authors combined expertise the broad array of real life examples resonate with students from different backgrounds and fields of study and with different occupational goals in mind with its distinctive and effective combination of cutting edge research applications readability and essential knowledge this text helps students understand and appreciate what today s scientists are discovering about human development across the lifespan how they study the process and how this knowledge can be used to improve the lives of infants children adolescents and adults around the world

the authors wrote this book to help students think like developmental psychologists specifically they want students who read this book to critically examine claims about the nature and causes of development have a clear understanding of the major issues in developmental psychology to understand what developmental psychologists have learned about the development of

memory intelligence attachment and other developmental issues pref

the final volume in this significant series this publication mirrors the broad scientific attention given to ideas and issues associated with the life span perspective constancy and change in human development opportunities for and constraints on plasticity in structure and function across life the potential for intervention across the entire life course and thus for the creation of an applied developmental science individual differences diversity in life paths in contexts or the ecology of human development and in changing relations between people and contexts interconnections and discontinuities across age levels and developmental periods and the importance of integrating biological psychological social cultural and historical levels of organization in order to understand human development

work across the lifespan coalesces theoretical and empirical perspectives on aging and work this volume examines a collection of human development theories that explain trajectories of change including patterns of growth maintenance and decline across the adult lifespan at its core the lifespan perspective assumes a focus on aging as a continuous process of intraindividual change and goal based self regulation in this text the lifespan perspective serves as a lens for examining the complex relationship between aging and work integrating research from the fields of developmental psychology as well as industrial work and organizational psychology this authoritative reference brings together the collective thinking of researchers who study work careers organizations and aging
